

Construction Careers Bursary

supported by wienerberger

wienerberger have provided bursary monies to NHP for the sole purpose of supporting care leavers to access careers within the construction industry. The bursary follows a similar process to the already established NHP Aspirational Awards, however the application window will be open all year round or until funds for the year are used.

Young people across LHPs can make applications to receive financial support. Funding will specifically be around access to construction/trades. For example, gaining a CSCS card, engineering, bricklaying or plumbing courses, work tools/clothing or course/cost of living fees.

In order to apply young people:

- must be supported by their LHP to make the application
- should have completed units within the House Project Programme

In return

- Decisions will be made by NHP within 28 days of application, and they will consider the circumstances shared by young people and their LHPs.
- NHP may request further information on an application or may ask you to change the amount requested depending on the overall funds remaining.
- NHP may check that you have explored options with your Virtual School prior to application. They may also seek the opinion of wienerberger on the applications submitted.

To support the continuation of this bursary, we would appreciate hearing back from you how the award was used and how it has impacted you.

There is no window for applications. Applications can be sent at any time of the year.

Completed application forms should be submitted to enquiries@thehouseproject.org.
